

### OVERVIEW

MT Systems provides advanced solutions to manufacturers incorporating high pressure piping with pumps and a number of proprietary details. MT Systems' worked with Dunbar, believing our **Special ** services could benefit their client.

### LET'S LET THE CLIENT TELL YOU MORE

I had another fabricator for this work before and now that we've used you on four jobs I can compare the two. **Dunbar's process piping welding and craftsmanship is superior.** We have had next to nothing to fix on any of the welds, it's just been really, really good.

Secondly, **your packaging and how you supply the units just really stands out. It's easy to handle and very well organized.** You found out what you needed to do for international shipping and took care of it well. You're shipping us a complete package. It's already designed, laid out, labeled and ready to drop in. It's a much tougher application than usual and Dunbar has done a really good job with all of it, even the special paint required by our client.

**Your people have made recommendations our engineers are using.** We like working with Dunbar. You're good at what you do and very supportive. I like that you keep building on what you know and how you work with us. Would I refer you to others? Yes — and I do speak about you already. **Will we work with you in the future? Yes.**
